**How To Cook Quinoa**

**Serves 4 to 6**

**Ingredients:**
- Uncooked Quinoa (any variety- white, red, or black): 1 cup
- Olive Oil (optional): 2 cups
- Water or stock (any kind- beef, chicken, vegetable): ½ tsp
- Kosher Salt: For Garnish

**Equipment:**
- Fine-mesh strainer
- 2-quart saucepan with lid

**Instructions:**
1. Rinse the quinoa: Measure 1 cup of quinoa and place into a fine-mesh strainer. Rinse thoroughly with cool water for about 2 minutes. Rub and swish the quinoa with your hand while rinsing. Drain.
2. Toast quinoa in saucepan (optional): Heat a drizzle of olive oil in the saucepan over medium-high heat, and add the drained quinoa. Cook, stirring, for about 1 minute to let the water evaporate and toast the quinoa.
3. Add liquid and bring to a boil: Stir in 2 cups of water or broth and the salt. Bring to a rolling boil.
4. Lower heat and cook, covered, for 15 minutes. Turn heat down to the lowest setting. Cover and cook for 15 minutes.
5. Let stand, covered, for 5 minutes: Remove the pot from heat and let stand for 5 more minutes, covered. Don’t peek!
6. Fluff and eat! Remove the lid - You should see tiny spirals (the germ) separating from the curling around the quinoa seeds. Fluff the quinoa gently with a fork, and serve. If any liquid remains in the bottom of the pan or if the quinoa is still a bit crunchy, return the pot to low heat and cook, covered, for another 5 minutes, until all the water has been absorbed.
